

UDC

University biologists believe this "undeath" phenomenon has been with us historically. To study their research, go onto the U.C. Berkeley campus, enter the Valley Life Sciences Building, and find the University & Jepson Herbaria on the first floor, at undead Tyrannosaurus. Find the UDC agent there. Note that some of this building's entrances are locked; some are not locked; if you try an entrance and it's locked, please try a different entrance. (If the agent is not at the Herbaria, look for the agent around the main North Entrance to the building.)
