

# UNDERGROUND ZOMBIES

---

Property of  Do not disseminate.

BART closed circuit security cameras captured four zombies (whom we're calling Z1, Z2, Z3, and Z4) using the trains yesterday morning to get around the Bay Area. But although the time-stamps on the cameras were working, the locations of the camera feeds were garbled. The only one we could identify is a feed from **this station**, because the zombie leaving shortly before 9:00am was spotted here by a UDC agent.

We've distinguished between zombies Z1, Z2, Z3, Z4. We're hoping that if we can understand the pattern of their movements, we may gain insight on why they're using BART to get around.

Attached is a list of the BART stations for your reference, and a log of the activity witnessed in the camera feeds.
